Privacy & Data Protection for Nonprofits

A Guide to Navigating Privacy Laws

Wednesday, July 29, 2026 | 1 - 2:00 p.m. PDT | Via Zoom

Nonprofits collect and store a wide range of sensitive information such as donor records, employee data, client information, and volunteer applications. Poor data privacy practices can expose an organization to legal liability, financial loss, and reputational harm. Join us to learn about the privacy and data protection issues that California nonprofits face, and best practices to protect your organization.

What we'll cover:

- Understanding what information you collect and how to protect it
- CA privacy laws and when they do and don't apply
- Federal privacy laws such as HIPAA
- AI and associated risks
- Responding to data breaches
- Practical steps for small CA nonprofits to improve their privacy practices

Register now!

Space is limited. Please complete [this](#) form to register.

Registration Deadline:
Tuesday, July 28, 2026

This session is designed for nonprofit leaders, board members, operations staff, and others who want to better understand the laws that affect California nonprofits and how to protect their organization.
